

CONSISTENT PRICING

Pricing is the same for flats and corners across ALL profiles, no matter the style. This will make bidding quick and easy.

EXCLUSIVITY

Mutual Materials is the sole supplier of Sunset Stone in WA, OR, ID, and MT.

LOWER PRICING

Sunset Stone's quality is on par with competitors, but at a much more affordable price.

WARRANTY

Sunset Stone has a 50-year warranty on all stone products. This will cover product failures, not wrongful installation. Customers should refer to the CMHA MSV Installation Guide for best installation practices.

LOW WEIGHT AGGREGATE

Sunset Stone utilizes expanded shale instead of pumice for their low weight aggregate. This reduces the stone weight and water absorption levels. Pumice absorbs 22% of its body weight while expanded shale only absorbs 12%. This will reduce efflorescence and freeze-thaw concerns. Note, the stone will be slightly harder to cut than other MSVs.

POWDER COLOR

Coloring is done by hand with powder dye as compared to sprayed on liquid dyes. This creates a more authentic look, and reduces the risk of color differences between flats and corners. Color touch up kits are not available, but the base of each stone is dyed to match the profile making chips and scratches harder to see.

ASTM TESTED & CMHA CERTIFIED

All Sunset Stone profiles meet ASTM standards and are CMHA certified.

We currently stock 15 profiles, but any profile can be special ordered. If you have any questions regarding Sunset Stone, please reach out to your local sales rep or one of the contacts below.
